

STTAURX

White Paper & Business Deck Task Tracker

Last Updated: February 03, 2026

CRITICAL DIFFERENTIATOR: HSBC Certificate-Triggered Minting

"When you deposit USD, HSBC purchases gold at that moment's spot price from a Top-6 global broker. Only when HSBC issues a certificate does token minting occur. Your deposit = Your gold = Your certificate = Your tokens."

Aspect	PAXG / XAUT	STTAURX
Custodian	Crypto company vaults	HSBC (Tier-1 G-SIB Bank)
Gold Source	Unknown market purchases	Top-6 Global Gold Broker
Minting Trigger	Company discretion	Certificate from HSBC
Price Basis	Exchange market price	Spot price at YOUR purchase
Ownership	Pool share (ambiguous)	Allocated gold + serial numbers
Verification	Quarterly attestation	Real-time certificate lookup
User Flow	Buy token → hope gold exists	Deposit → Gold → Certificate → Token

Key Messaging Points

1. Certificate-Triggered Minting - Tokens only exist because certificates exist
2. HSBC Custody, Not Crypto Vaults - Tier-1 bank, institutional grade
3. Spot Price Locking - Your price is YOUR purchase price
4. Top-6 Broker Supply Chain - Same suppliers as central banks
5. Real-Time Verification - Not quarterly 'trust us' reports

Strategic Positioning: The Apple Approach

"We are not creating a coin hoping someone builds a marketplace. We are not creating a marketplace hoping someone uses our coin. We are building a complete, closed-loop ecosystem - the Apple approach to commodity-backed digital assets."

Market Landscape Analysis

Approach	Examples	Problem
Coin-Only	PAXG, XAUT, AWG	No native marketplace; liquidity issues
Marketplace-Only	NASDAQ, NYSE, LSEG	No native stablecoin; complex settlement
STTAURX	Full Ecosystem	Coin + Marketplace + Wallet + Yield

Research Evidence Collected

1. Traditional Exchanges Building Blockchain

Institution	Initiative	Status	Limitation
NASDAQ	Tokenized securities	SEC filing Sept 2025	No native stablecoin
NYSE	24/7 blockchain trading	Pending, H2 2026	Equities only
LSEG	Digital Markets Infra	Launched Jan 2026	Infrastructure only
JPMorgan	MONEY tokenized fund	Live Dec 2025	\$1M min, institutional

2. Gold Token Problems (From Reuters, Feb 3, 2026)

Problem	STTAURX Solution
Custody Uncertainty "You may own only the token"	HSBC certificate = clear ownership
Regulatory Gaps "US lacks clear framework"	Compliance-first + HSBC structure
Redemption Risk "Rush could expose gaps"	Certificate-backed + staking
Low Liquidity	Built-in native marketplace
Zero Yield	5% APY staking rewards

3. Market Statistics (2026)

Metric	Value	Source
Gold Token Market Cap	\$6 billion	CoinGecko
Market Growth	4x since end of 2024	Reuters
Gold Price	\$4,500+ (target \$5,000)	Multiple

2025 Gold Rally	+66%	CME Group
2025 Silver Rally	+135%	CME Group
Tokenized RWA Market	\$24B now, \$30T by 2034	Standard Chartered

White Paper Section Status

#	Section	Status	Priority
1	Abstract / Executive Summary	Not Started	HIGH
2	Problem Statement	Research Done	HIGH
3	Solution Overview	Outline Ready	HIGH
4	Market Opportunity	Data Collected	MEDIUM

15	Contact	Not Started

Next Actions

Immediate (Today)

- ☐ Review HSBC custody flow documentation
- ☐ Prioritize which white paper section to write first
- ☐ Decide on business deck format (PPTX vs web-based)

This Week

- ☐ Complete Problem Statement section with research
- ☐ Write Solution Overview with HSBC minting flow
- ☐ Start business deck design

This Month

- ☐ Complete first draft of all white paper sections
- ☐ Create full business deck
- ☐ Begin legal review process
